## 背景介绍

NAMA基金会由德国、英国、丹麦和欧盟委员会共同成立，其主旨为通过促进行业转型升级在全球范围内实现应对气候变化的目标。为此，NAMA基金会大力促进应对气候变化活动，并帮助发展中国家和新兴经济体以国家自主贡献（INDC）的形式履行“巴黎协定”的承诺。

作为国家自主减排贡献的参与者，中国承诺2030年单位GDP二氧化碳排放强度比2005年下降60%-65%。为促进这一目标的实现，在NAMA基金会及中国住房和城乡建设部（MoHURD）的支持下，中国城市生活垃圾处理领域国家适当减缓行动项目（IWM NAMA）于2017年9月正式启动。

通过一系列垃圾综合管理示范城市建设以及垃圾管理合作交流平台建设，IWM NAMA项目将借此推动中国垃圾处理行业向可持续发展转型，最终实现中国发展低碳循环经济的目标。

IWM NAMA项目由德国国际合作机构（GIZ）和中国城市环境卫生协会（CAUES）共同实施。作为执行机构，GIZ在中国开展中德技术合作已有30多年历史，在中德全面战略伙伴关系下推动着可持续发展和应对气候变化的双边互惠合作。

## Background

The NAMA Facility, jointly funded by the governments of Germany, United Kingdom and Denmark as well as by the European Commission, plays the leading role in supporting transformational sector-based initiatives throughout the world to respond to the challenges of climate change. In doing so the NAMA Facility inspires ambitious action and helps developing countries and emerging economies to deliver on their Paris Agreement commitments in the form of Intended Nationally Determined Contributions (INDC).

As part of the INDCs, China has announced the goal of reducing its CO<sub>2</sub> emissions per unit of GDP by 60 to 65 percent below 2005 levels by 2030. To contribute to this goal, China Integrated Waste Management NAMA (IWM NAMA) Project, headed by the NAMA Facility and the Chinese Ministry of Housing and Urban-Rural Development (MoHURD), was launched in September 2017.

The project supports China's ambition for low-carbon urbanisation through piloting IWM approaches in a number of demonstration municipalities as well as promoting waste management partnerships and networks. These measures are to catalyze the transformation of the Chinese waste sector towards a sustainable path with an ultimate goal of establishing a circular low-carbon economy.

The IWM NAMA project is implemented by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH jointly with the Chinese Association of Urban Environmental Sanitation (CAUES). As the implementing organization, GIZ has over 30 years of experience in the field of Sino-German technical cooperation, working within the framework of the Comprehensive Sino-German Strategic Partnership for the mutual benefit of both countries in the areas of sustainable development and climate change mitigation.
